Respondent acknowledges receipt of Addendum: \_\_\_\_\_  
Respondent’s Signature Date

**The proposal’s due date has changed from Tuesday, April 7, 2026 at 2:00 p.m. est., to **Monday, April 13, 2026, at 2:00 p.m. EST****

---

**Question:**

Please add additional details to the requirement for

“Integration of essential functional components (e.g., forms, procurement postings, portals, payment systems as applicable)” Can you identify portals, and payment systems employed by the organization.

---

**BMHA Response:**

**BMHA is currently in the process of implementing Yardi as its housing management platform. While full integration is still in progress, the selected vendor should anticipate the need to integrate with or support Yardi-based functionality as part of the website ecosystem.**

At this time, BMHA does not have an active online rent or payment system; however, as part of our organizational transformation, we anticipate implementing digital payment capabilities in the near future.

The website should be designed to accommodate future integration with payment processing systems.

In the interim, the website should support:

- Seamless user pathways to external platforms (as needed)
- Scalable architecture that allows for future system integration without requiring significant redevelopment

Respondents should demonstrate experience working with or integrating third-party platforms such as Yardi or similar systems and propose flexible, future-ready solutions.

---

**NOTE:**

**All respondents who have submitted Proposals, you can mail to BMHA or send this Addendum 2 acknowledgement via email to [benobleconsulting@gmail.com](mailto:benobleconsulting@gmail.com) by the due date and time.**
